EPTA GRUPPO / GROUP PROFILE

2025

English Version

The Epta Gruppo is the set of entrepreneurial realities born from the will of its historical founders, the Fratelli Bruggnetini.

Conceived to enclose the owned companies in a single brand, the Greek word Epta represents the seven shareholders of the eclectic group, with which they identify the fundamental principles and historical family values that underlie each activity.

Attachment to the family, dedication to work, continuous innovation, attention to quality, moral integrity, social commitment, respect for the environment and protection of the territory are the key values on which every decision and every future projection are based.
